InfinityStrut

Modular Mounting System

Transform your service body compartments into a fully customizable, heavy-duty workspace with our modular rugged accessories system. Designed around the proven strength and versatility of Unistrut mounting channels, the InfinityStrut system lets you configure, adjust, and expand your storage exactly the way you need it.

Highlights

- **Unistrut-based mounting:** At the core is the industry-standard Unistrut channel, engineered for strength and flexibility. It provides a universal foundation where shelves, bins, brackets, and hooks mount securely—yet can be repositioned in minutes.
- **Modular by design:** No two jobs are the same. That's why this system lets you reconfigure as your needs evolve. Add new accessories, rearrange existing ones, and keep your setup efficient and organized.
- **Superior organization:** Keep your gear, tools, and parts in their place. Spend less time searching for them and more time doing what matters most.

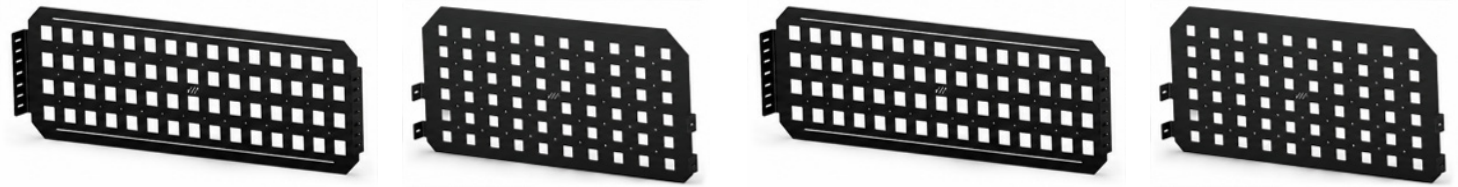

Your benefits

- **Modular and flexible:** rearrange your storage space as your workflow changes
- **Rugged and reliable:** built from heavy-duty, corrosion-resistant materials, you can be sure your InfinityStrut panels and accessories will stand the test of time.
- **Maximized space:** every tool, part, and piece of equipment has its designated place, meaning you spend less time organizing and searching for tools.

Options

Molle Panels

Use the mounting squares to organize accessory holders for a variety of tools and loose items. Compatible with ServicePro XP steel & aluminum.

Pack Out Panels

Interlocking hard-box storage system for cases and tool boxes. Compatible with ServicePro XP steel & aluminum.

Accessories

Pair the accessories with the Molle and Pack Out systems to hold tools, cables, parts, and more.
